Fluke Connect® compatible

The Fluke PRO series cameras introduce a leading-edge visual infrared experience. Smartest, most intuitive user interface. Increased thermal sensitivity to capture the smallest differences. Latest technology for on-screen clarity. Lens compatibility to capture targets tiny-to-large.

- Increased sensitivity to visualize temperature differences, NETD for the Ti450 PRO is ≤ 0.025 °C at 30 °C target temp (25 mK)
- Easier to visualize and diagnose issues with sharper on-screen images, multiple rectangle markers and 9 color palettes
- More intuitive visual interface, improved, user-tested, touch screen interface
- More flexibility to visualize targets—tiny to large with interchange able smart lenses—no calibration required, 2x and 4x telephoto, wide angle and macro lenses are compatible with Ti480 PRO and Ti450 PRO
- Capture a clear, accurate image focused throughout the field of view with MultiSharp™ Focus.
- Get an instant in-focus image of your designated target.

 LaserSharp® Auto Focus uses a built-in laser distance meter that calculates and displays the distance from your designated target
- Get 4x the pixel data with SuperResolution, which captures multiple images and combines them to create a 1280 x 960 image (Ti480 PRO) or a 640 x 480 image (Ti450 PRO)
- Reduce the need to take notes in the field with two helpful features; IR-PhotoNotes $^{\text{TM}}$ and voice annotations
- Highlight areas that are outside your pre-set 'normal' temperature ranges quickly with color alarms
- Save time—wirelessly sync images directly from your camera to the Fluke Connect* system, and attach to an asset record or work order. Make faster decisions by accessing inspection measurements from anywhere. Team members can instantly see the same data, at the inspection site and the office.

Powerful, easy-to-use Fluke Connect®

A comprehensive and connected software platform that represents the future of integrated equipment maintenance, monitoring, analysis and reporting. It's easier than ever to optimize thermal images, perform analytics, generate quick, customizable, robust reports, and export images to the format of your choice in the cloud. And you will be able to integrate with Fluke Connect-the largest integrated system of maintenance software and tools in the world.

- Modern visual design
- · Intuitive navigation-easier to learn, easier and faster to work in
- Simplified work flows
- Simplified reporting workflow and better report templates
- · Fluke Connect Cloud storage

Preventive maintenance simplified. Rework eliminated.

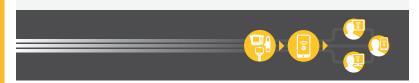

Save time and improve the reliability of your maintenance data by wirelessly syncing measurements using the Fluke Connect* system.

- Eliminate data-entry errors by saving measurements directly from the tool and associating them with the work order, report or asset record.
- Maximize uptime and make confident maintenance decisions with data you can trust and trace.
- Move away from clipboards, notebooks and multiple spreadsheets with a wireless one-step measurement transfer.
- Access baseline, historical and current measurements by asset.
- Share your measurement data using ShareLive™ video calls and emails.
- The Ti450 PRO and Ti480 PRO infrared cameras are part of a growing system of connected test tools and equipment maintenance software.
