General description

The FLIR T640bx is designed for the expert requiring the highest performance and the latest technology available. The camera combines excellent ergonomics and a walk-up-and-use interface with superior image quality of 640×480 pixel infrared resolution. The FLIR T640bx is flexible and can meet your every need, and has extensive communication options.

Benefits:

- Highest performance with the latest technology: The FLIR T640bx is equipped with the innovative Multi Spectral Dynamic Imaging (MSX) feature, which produces an image richer in detail than ever before. Continuous auto-focus makes the FLIR T640bx the first fully automatic infrared camera on the market.
- Ground-breaking efficiency: You can highlight objects of interest, on both the infrared and the visual
 images, by sketching or adding predefined stamps directly onto the camera's capacitive touch
 screen. The user interface is intuitive and logical for effective operation. Auto-orientation allows you
 to tilt between landscape and portrait views.
- Extensive communication options: The Wi-Fi connectivity of the FLIR T640bx allows you to connect
 to smart phones or tablets for the wireless transfer of images or the remote control of the camera.
 The Bluetooth-based METERLiNK function transfers readings from external measurement
 instruments to the infrared image.
- Support for UltraMax: When enabling UltraMax in the camera, the resolution of images can be substantially enhanced when importing the images into FLIR Tools.
